

CA38-type Connector for up to 75 kVDC

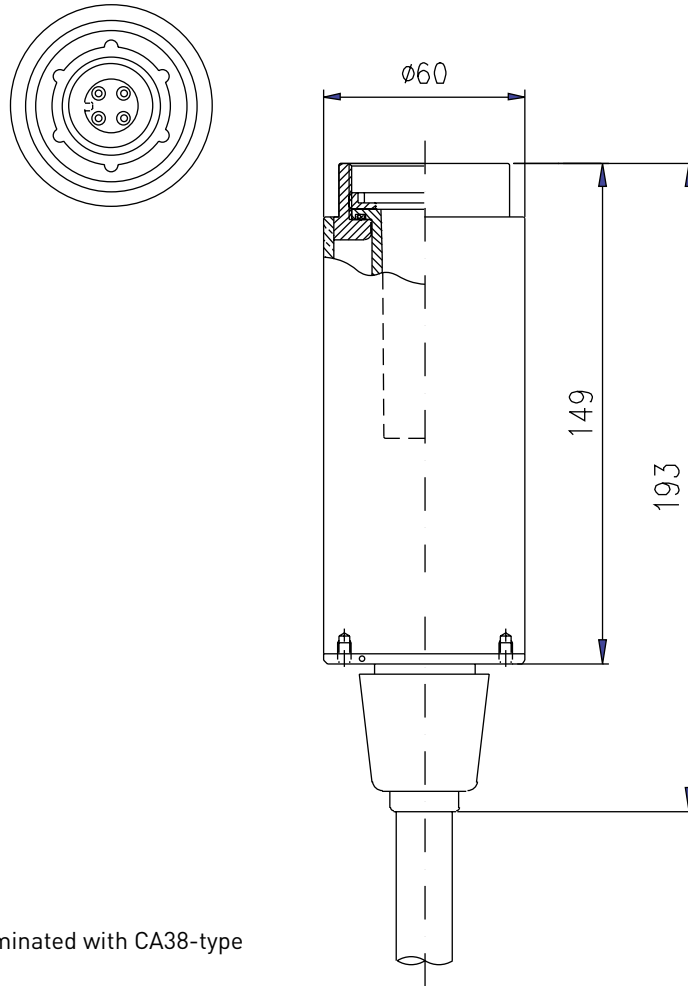

The CA38-type connector is a 75 kVDC rated female connector that mates with our male CA11 (Mini75) miniature connector.

Features

- Compact, light-weight adapter for CA11-type mini connector.
- Maintenance-free.
- Easy connect/disconnect.

Description

The CA38-type connector is a 75 kVDC rated female connector that mates with our male CA11 (Mini75) miniature connector to realize a compact and light-weight high voltage extension cord functionality. The connection has all the benefits of our CA11 connection system and results in a reliable and maintenance-free high voltage connection.

Cable types

The following cable types can be terminated with CA38-type connectors

L3 (Locaflex 3 conductors, 75 kVDC)
T3 (Superflex, conductors, 75 kVDC)
T4 (4 conductors, 75 kVDC)

Technical data

Maximum continuous voltage between contact inserts and grounding flange	75 kVDC
Number of contacts	4
Maximum continuous voltage between pins	3 kVDC
Maximum continuous current (each pin)	15 A
