

## June 28th, 2007. - Press Release -

Claymount, market leader in high voltage cable assemblies & receptacles, announces today that it has acquired the "Telamat" AEC measuring chamber product line from Comet AG in Switzerland. The development, manufacturing and supply will be transferred to Claymount's new modern facility in the Netherlands. An additional expansion of 1000 sq. meters is in preparation. The transfer date is set for September 1st, 2007.

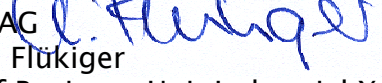

A joint (Claymount/Comet) taskforce is now fully in operation to prepare and manage the transfer of knowledge and know-how as smoothly as possible and to prevent any bottlenecks occurring in the supply of the products to its existing customers. Engineering exchange will be conducted under full ownership of the Claymount Development Centre to ensure the future generation of AEC measuring chambers.

Mr. Jeffrey R. Tierie – President & CEO of the Claymount Group points out that this new product line will be a valuable asset to the company's product portfolio. It will give Claymount the opportunity to expand its co-makership and partnership with the local and global operating OEM's, within the medical X-ray market. It fits perfectly in the Claymount strategy to become a world class, strategic, component supplier for X-ray and other high voltage applications as specified by original equipment manufacturers.

Mr. Charles Flükiger, Head of Business Unit Industrial X-ray, remarks that it is and has always been Comet's responsibility to see to it that continuity in development, service and supply to the customers is secured. Comet AG has experienced through its cooperation with Claymount in other areas that it is a perfect fit for this product line to the benefit of the customers and the market.

This product line will be positioned as an additional product to its portfolio and will be promoted next to its present products such as, cable, connectors, and receptacles. Also see Claymount's website: [www.claymount.com](http://www.claymount.com).
