Claymount Technologies Group makes strategic acquisition

The Claymount Technologies Group, a group of companies engaged in the business of manufacturing specialist high voltage X-ray equipment components and Hoorn Holland BV, a company engaged in the business of manufacturing mammography and radiography Bucky systems and docking stations have decided to join forces. The Parties have come to an agreement on the transfer of substantially all of the assets to the Claymount Technologies Group. As part of the transaction the owner and founder of Hoorn Holland BV, Mr. K. Hilhorst, will join Claymount leading the new product group team, "Buckies and Docking stations", that will support Claymount's global customer service operations! This new product team will be based in the Netherlands. All operational and logistical activities will be completely transferred, by May 7th, 2010, to the Claymount facilities, in Dinxperlo, The Netherlands and Calamba, the Philippines.

Jeffrey R. Tierie MBA, CEO of the Claymount Technologies Group, comments:

"I am delighted about the new challenges and opportunities this acquisition will bring for our customers. The excellent technology fit and the benefits of our global operations platform will boost our "one stop shop" approach. I am sure that Mr. Kees Hilhorst and his team will add value to our customer products in technology and combined product capabilities".

Kees Hilhorst, President of Hoorn Holland BV, comments:

"With the global presence and profound marketing strategy of Claymount, our products can make an important step in worldwide integration of our products in X-ray diagnostic units. With production experience in the Philippines and in combination with other Claymount product-lines we can now address X-ray manufacturers and System Integrators needs better than ever before".

All parties involved have decided not to disclose any financial details on this transaction.

For any additional information please contact our head-office in the Netherlands.
